FIRST AID FOR SEIZURES

WHEN TO CALL 911 – EMERGENCY MEDICAL SERVICES:

- STUDENTS NOT DIAGNOSED with EPILEPSY AND SEIZURE DISORDER :**
 - **CALL 911 IMMEDIATELY**

- GENERALIZED CONVULSIVE SEIZURE (e.g. Tonic Clonic Seizure):**
 - **CALL 911 IMMEDIATELY**
UNLESS: you are aware of a different protocol for this student as outlined in the student’s Seizure Disorder Management Plan

- IF IN DOUBT – CALL 911**

STEPS IN MANAGING AN INDIVIDUAL EXPERIENCING A SEIZURE:

PARTIAL NON- CONVULSIVE SEIZURES – RESPONSE:

1. **KEEP CALM. STAY WITH THE PERSON**
 - Do not try to stop the seizure, let the seizure take its course
 - Talk gently and reassure the person that everything is ok and you are there to help
 - The person will be unaware of his/her actions and may or may not hear you
 - Using a light touch, guide the student away from hazards

GENERALIZED CONVULSIVE SEIZURES – RESPONSE:

1. **KEEP CALM. STAY WITH THE PERSON**
 - Take note of the time when seizure begins and length of seizure (e.g. stop watch). Record time on Seizure Incident Record Form.

2. **DO NOT RESTRAIN OR INTERFERE WITH THE PERSON’S MOVEMENTS**
 - Do not try to stop the seizure, let the seizure take its course

3. **PROTECT FROM FURTHER INJURY WHERE POSSIBLE**
 - Move hard or sharp objects away
 - Place something soft under the head (e.g. pillow, article of clothing)
 - Loosen tight clothing especially at the neck

4. **DO NOT PLACE OR FORCE ANYTHING IN THE PERSON’S MOUTH**
 - Doing so may cause harm to the teeth, gums or even break someone’s jaw
 - It is physically impossible to swallow the tongue
 - The person may bite their tongue and/or inside of their mouth

5. **ROLL THE PERSON TO THEIR SIDE AS SOON AS POSSIBLE:**
 - Sometimes during and after a seizure a person may vomit or drool. To prevent choking, simply roll the person on their side. That way, fluids will drain out instead of blocking off the throat and airway.
 - DO NOT BE FRIGHTENED if a person having a seizure appears to stop breathing momentarily

AFTER ALL TYPES OF SEIZURES (The student will be groggy and disoriented).

- Talk gently to comfort and reassure the person that everything is ok
- Stay with them until they become re-oriented
- Provide a place where the student can rest before returning to regular activities
